

اطلاعات فنی

This 130 motor can be used as a hand-cranked generator and wind generator. It can turn on the 3v led light directly with a turn of the hand, and the power generation efficiency is high. In addition, the motor can also be connected to a solar panel and powered by solar energy. Moreover, the motor brush is a carbon brush and can be powered for a long period of time. It is wear-resistant and has a long life.

[working voltage]: DC 1.5V-12V can be between

[Reference speed]: 3000RPM (6V), 5400RPM (12V)

[Reference current]: 3V voltage, no-load current 30MA, blocking current 90ma

[Motor Size]: Length 25 * Thickness 20 * Height 15mm

[motor shaft diameter]: 2mm

[Out shaft length]: Front end 19mm, rear end 9mm

[motor weight]: about 18.45g
